October 6, 2009

Dear Wilchester Families,

We are excited that our school has chosen *First In Math*, an interactive, online tool to support math practice and strengthen math skills! Thanks to our generous PTA, Wilchester students in grades 1-5 now have a new, dynamic way to challenge themselves mathematically as they practice learned concepts carried over from the classroom, facts, and other challenging activities tailored to individual students' needs. Your child has their own username and password that will allow them access to this tool throughout the school year. Please join us in encouraging your child to log on to www.firstinmath.com as often as possible.

Students are able to log on as much as possible, and their hard work online is encouraged through earning "virtual stickers" and healthy competition. Each child is part of a "team," their homeroom class. Team and individual problem solving is tracked and highlighted periodically at school. In addition, our school is able to compete with other schools across the country, and all learners succeed when math practice is this engaging and fun!

Please see the attached flyer for specific instructions for login and detailed program information. Thank you for your continued support, and we hope that you and your child enjoy *First In Math*!

WELCOME TO

www.firstinmath.com

**This dynamic, easy-to-use
online program will help
strengthen your child's
math skills!**

*making
math fun
for almost
20 years!*

**Our school has chosen this educational website
because it is a great way for students to gain math skills—and have fun!**

- Game play develops and reinforces basics.
- Children proceed at their own pace—mastering facts and increasing problem-solving, computation, critical-thinking and pattern-recognition skills—as they advance through the levels of the program.
- Each child will receive his/her own, personal User ID and Password.
- Easy to use from home—no software to install—PC/MAC compatible

Studies show that children who play the 24® game on a regular basis experience significant improvement in both their skill level and their attitude about math!

Based on the 24® game, the FIRST IN MATH® Online Program gets young people excited about math, engaging them like no workbook ever could.

Your child will be able to play at school and at home, on any computer with internet access. We hope you will encourage your child to log on to **firstinmath.com** as often as possible. Go online together and discover a great learning experience!

The First In Math® site is for educational purposes only and contains no advertising messages or links.
