

Parents of 6th Graders...From the Clinic:

All incoming 7th grade students are required to have additional vaccines. Many students have already had these, and some are on file. Many students may have received these, but I need an updated copy of the shot record. And if your child has not yet had their check-up, the following vaccines are needed prior to entering 7th grade.

Tdap
Varicella #2
Meningitis (MCV4, Menactra)

I have information on low cost and free vaccine clinics, if you need assistance.

Thank you for your help with this, and please feel free to contact me for any questions.
